Logging and Scheduling Activities

- Activities = Tasks, Events, Emails
  - Events
    - Scheduled meetings or conference calls (Beginning and End time
  - Tasks
    - Any activity other than an event including phone calls, letters, etc.
    - Defined by Task "Type"
  - Emails
    - HTML vs. Text
    - BCC will go to your Outlook Inbox

Proprietary and Confidential Summa 2011

Activity Guidelines

When should I create Activity Records?

- Meetings:
  - All relevant meetings with customers and prospects should be documented. These are entered as “Events”.
- Tasks:
  - Create a Task to remind you to make a follow-up phone call, send an e-mail, letter, etc.
  - All tasks that impact the customer relationship
  - To-Do’s

Proprietary and Confidential Summa 2011

Tips

- Using HTML emails allows you to track when and how many times an email has been opened
- All Activity Records should relate to a Contact Record
  - Why? Tasks and Events created in Contact Records will automatically be related to the originating record, and will roll up to the corresponding Account record.
  - Other relationships (like Order Records) will need to be added

Proprietary and Confidential Summa 2011

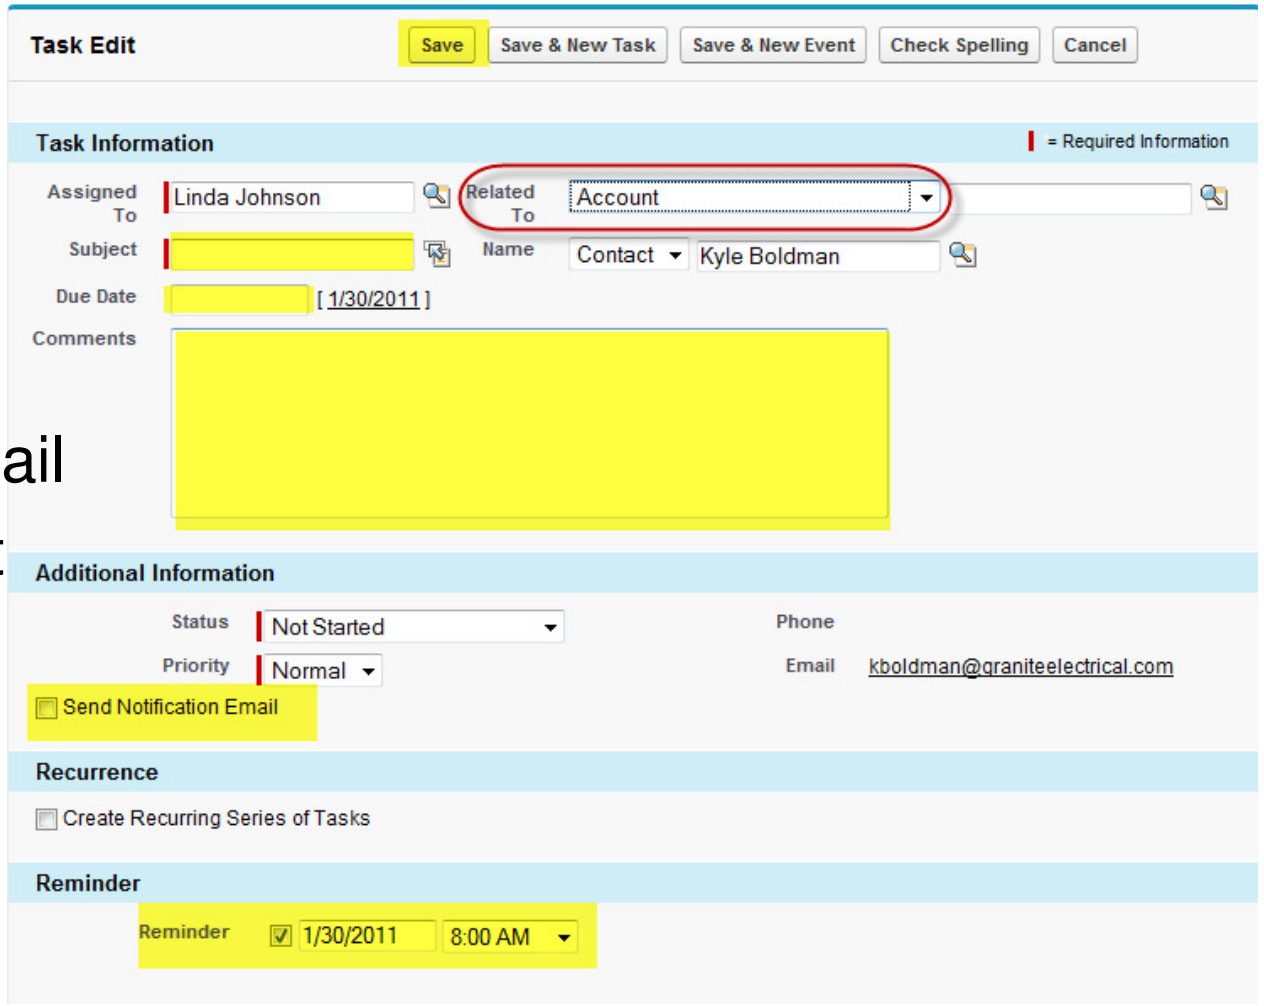

Creating Tasks

- Open Activities - New Task from the Contact Record
  - Click “New Task” button

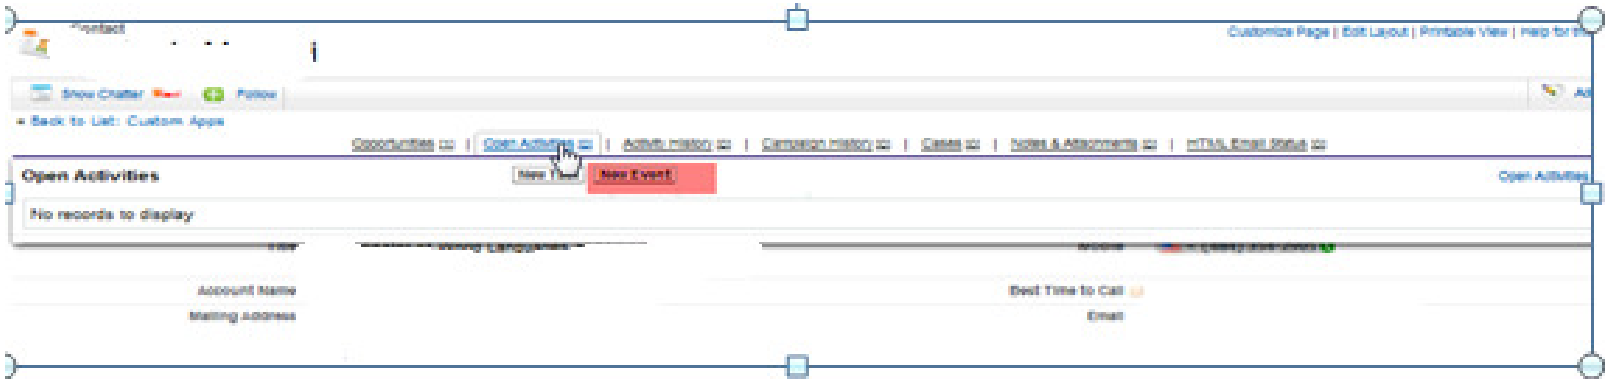

Creating Tasks

- Contact Name carries over
- Related To:
- Assign to other users – Send Notification Email
- Reminder – set to default
- Remember to "SAVE"
