MADE IN THE USA

Description

ADC's Type TC-ER shielded multi-conductor cables have a TFN or THHN/THWN (PVC/Nylon) insulation, aluminum shield and drain wire with an overall gas and oil resistant Polyvinyl Chloride (PVC) jacket.

Applications

Appropriate for use where shielding from electro-static interference is required in power, control and lighting circuits in a broad range of commercial and industrial applications. Suitable for use in Class 1 or 2, Division 2 hazardous locations and for installation in trays, wireways, troughs, channels, ducts and conduit. Expressly approved for direct burial, wet or dry locations and outdoors in cable trays where sunlight resistant rating is required.

Construction

Conductors: Soft Drawn Annealed Bare Copper per ASTM B-3 Concentric 7 strand. Concentric 19 strand available upon request.

Insulation: Thickness: UL-83 table 10 for THHN/THWN, UL-66 table 4.7 for TFN.

Conductor Jacket: Thickness: UL-83 table 13 for THHN/THWN, UL-66 paragraph 9.1 for TFN.

Cabling: Conductors are assembled with fillers in the core as needed.

Overall Shield: Aluminum mylar tape providing 100% coverage with a flexible stranded tinned copper drain wire.

Overall Jacket: A black, flame resistant, Polyvinyl Chloride (PVC) jacket is extruded over the assembly. The surface profile shall approximate that of the interior assembly. A nylon rip cord shall be inserted under the jacket for ease of stripping.

Color Code: ICEA Method 1, Table E-2 Standard. ICEA Method 1 Tables E-1, E-3 & Method 4.

Industry Listings & Standards

UL Listed as TC-ER per UL Standard 1277
OSHA Acceptable
NEC Articles 392 & 336
CSA FT4
