Cop-Flex 2000® vs. TelcoFlex® LII

Cop-Flex 2000® supplied by Cobra Wire & Cable is not a TelcoFlex® LII equal. Cop-Flex 2000® is more of an alternative to TelcoFlex® LII. The ratings and the actual construction of the two materials are not the same.

Some important differences:

- TelcoFlex® has a mylar tape under the insulation for easy stripping and sequential footage markings for easy cutting in the field.

- Cop-Flex 2000® does not have CSA, CT Use, and the Central Office Power Cable ratings.

If your end user is requesting TelcoFlex® LII, they are requesting the brand name item.

Here are some key differences between Cop-Flex 200® and TelcoFlex® LII:

	CopFlex 2000, Class I	Telcoflex LII
